REVISED PROSPECT LIST

No standalone website found in reviewed sources • social-first prospects

Selection rule
Only prospects for whom a standalone official website was not found in the reviewed search results are included. Existing Linktree pages are treated as social link hubs, not full websites. Social activity and ownership must still be checked manually before outreach.

Important correction
This revision removes businesses with known independent websites from the earlier list. Search evidence is imperfect: “no website found” is not proof that no website exists. The local research returned only five sufficiently supported candidates; three additional local slots are intentionally left unfilled rather than inventing businesses or social handles.

Research snapshot: 2 November 2026

Part C — Build and outreach rules

Demo integrity

Display a visible “Independent concept demo — not the official website” banner. Use only licensed/permissioned images. Do not copy an existing logo or imply endorsement. For simulated forms, bookings, logins, orders or payments, disclose that nothing is submitted or charged. Never fake a completed payment or real booking.

Design execution standard

- Make each prospect’s site visually distinct; avoid one template with a colour swap.
- Use premium typography, deliberate spacing, strong imagery, and mobile-first responsive layouts.
- Use animation to reinforce identity: logo draw, hero reveal, scroll transitions and micro-interactions.
- Keep startup intros short (roughly 600–1,000 ms), skippable, and never block the page.
- Respect reduced-motion settings and optimize for mid-range Android devices.
- Build working contact/booking backend only after the customer approves scope and production pricing.

Pre-build verification checklist

1. Open the social profile directly and check the most recent post date.
2. Confirm the account belongs to the named business/creator.
3. Search the name plus city and check for a standalone domain.
4. Confirm contact channel and permission to create a private concept preview.
5. Do not publish a demo publicly without permission.

Limitation: The web index does not reliably expose every Instagram page, latest post, email or official website. The document deliberately marks uncertain fields instead of guessing. Three local prospect slots remain open pending stronger evidence.
